

FitSaathi

Fitness that fits student life.

A campus fitness PWA that finds the right time, place and people for students to move.

Students do not need another generic workout plan.

They need fitness that works inside a real campus day.

THE FRICTION

1

Timetable gaps disappear

Short free slots are rarely turned into a clear, realistic activity plan.

2

Unsafe / uncertain conditions

Heat, rain and air quality make the best time and place hard to judge.

THE FITSAATHI RESPONSE

A

Fit Window + Smart Ques

Matches timetable, goals, duration and weather.

B

FitRoute

Shows weather-aware campus activity spots.

From a student's available moment to a trusted fitness action.

Personalised selection is rule-based; AI can enrich quest wording but never decides eligibility.

CONTEXT

Student context

Timetable & free slots
Fitness goal & level
Preferred activity / duration
Circle availability
Weather & AQI
Campus locations

DECISION

FitSaathi decision layer

Fit Window Engine
Finds the strongest available slot.

Smart Quest Planner
Selects a realistic next activity.

S

01

Can activity be faked?

We distinguish manual, quest, GPS and squad sources. GPS sessions reject implausible pace; co-located squads earn peer-verified status.

02

Does AI make opaque decisions?

No. Quest choice stays with transparent, testable logic; AI only writes personal quest content.

03

What about data and privacy?

04

Will it work on a student population?

A complete product flow that can be demonstrated on two device

DEMO FLOW

1

Onboard

Goal, fitness level, preferences and free timetable slots.

2

Discover

Fit Window suggests the right activity and FitRoute suggests the place.

3

Move together

Join a Fit Circle or start a shared GPS-based Squad Session.

A healthier campus begins with a fitness choice students can act make today.

01

Less decision friction

A specific next action is easier to start than a vague instruction to exercise more.

02

Safer choices

Students can favour green weather/AQI windows and campus spots with relevant conditions.

03

Social accountability

Circles, challenges and Squad Sessions make progress a shared campus experience.
